

# DS-6

## IP Panel-mounted Call Station

Individual modules with up to 48 push-to-talk buttons

# Established Neumann Elektronik quality

Up to 48 push-to-talk buttons

Integrated full range speaker, 1 W / 8  $\Omega$

Gooseneck electret microphone (420 mm or 550 mm)

High speech intelligibility (12kHz bandwidth)

Free key assignment as WL target keys or for local functions

Functions configurable through DS-6

Switch to off or low volume (low volume of 12 dB)

Direct speech connections via key-controlled line selection

Microphone surveillance

Slot for text memory

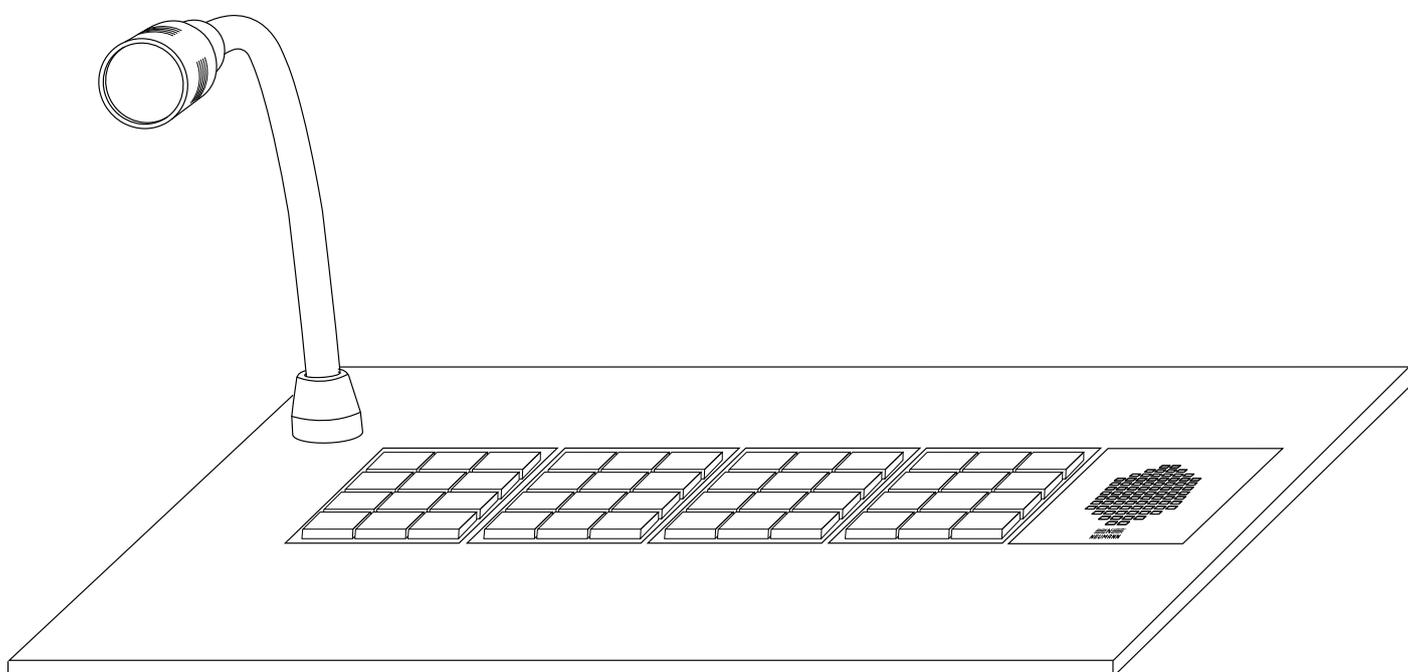

Low line expenditure

USB stick as speech storage optionally available

Example setup

## IP Panel-mounted Call Station

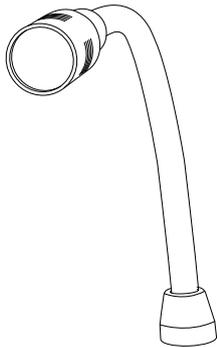

**Switch plate  
with 12 keys**  
Art.-No. 1 287 8

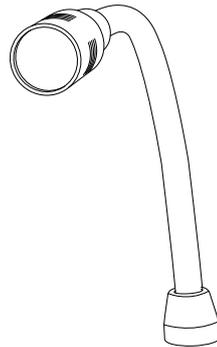

**Switch plate  
with 6 keys**  
Art.-No. 1 286 7

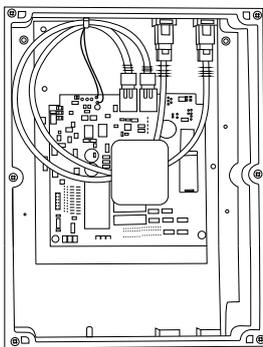

**Flush-mounted loudspeaker**  
1 W / 8 Ω  
Art.-No. 1 214 8

**Flexible gooseneck  
electret microphone (approx. 420 mm)**  
Art.-No. 1 288 9

**Flexible gooseneck  
electret microphone (approx. 550 mm)**  
Art.-No. 1 289 0

**Electronic and terminal housing**  
(up to 12 keys)  
Art.-No. 1 282 3  
(up to 48 keys)  
Art.-No. 1 283 4

The DS-6 Panel-mounted Call Station allows direct voice communication with other call stations. It can also be used for loudspeaker announcements and even for programmable local functions. The panel-mounted call station enables the assembly of call stations into switch boards and control consoles of control rooms.

The functions of the DS-6 Panel-mounted Call Station are consistent with the DS-6 desktop call station but it is subdivided into single hardware modules. It consists of a switch plate with push to talk buttons, flush-mounted loudspeaker, gooseneck microphone and a separate housing for electronic components and connectors. The switch plate and the flush-mounted loudspeaker are built in standard housings of 96 mm x 96 mm. They match to the assembly holes according to IEC 61554.

In addition to the destination keys for intercom / PA, the DS-6 Panel-mounted Call Station consists of a volume control function as well as a speech memory. A USB stick is used as speech memory and it is attached at the circuit board inside of the electronic housing. This USB stick provides standard tones and texts. Additionally, it can be loaded with customized announcements, tone sequences or other audio files which can be played back by pressing a key.

Hardware modules		
	1 286 7	Switch plate with 6 keys
	1 287 8	Switch plate with 12 keys
	1 214 8	Flush-mounted loudspeaker
	1 288 9	Gooseneck electret microphone (approx. 420 mm)
	1 289 0	Gooseneck electret microphone (approx. 550 mm)
	1 282 3	Electronic and terminal housing up to 12 keys
	1 283 4	Electronic and terminal housing up to 48 keys
	21 4 1143 001 7	USB stick. Includes standard tones and texts. It can also be loaded with customised announcement texts, or audio files, which can be played back at the touch of a button.

Physical data		
	Dimensions of housing for electronic components and terminals	110mm x 230mm x 300mm
	Length electret Gooseneck microphone	420mm / 550mm
	Weight	Approx. 3,5kg

Technical data		
	Network interfaces	2
	Power supply	Via network connection 1: Power over Ethernet in conformity with IEEE 802.3af Via AC adapter: 24 V DC -10/+15 % Centralized power supply: 48 V -10/+15 %
	IP hardware interface	LAN: 100-BASE-T Autonegotiation Ethernet: Ethernet in conformity with IEEE 802.3u (100Mbit/s)
	Frequency range	100Hz...12kHz
	Transmission protocol	IP: Neumann DS-6 protocol

Environmental data		
	Admissible temperature range	0... +50°C
	Protection class	IP20 acc. to DIN EN 60529
