

Module rack 19"

The module rack 19" is made for modules with 3HU according to DIN EN 60297-3-101 or IEC 60297-3. It has 84 MU space for assembling modules. At the rear side of the module rack a cable channel can be mounted at brackets over the 3HU. So the module rack 19" needs 4HU in the cabinet or frame. For covering the unused 1HU a front plate 19" is in the delivery. For fastening vertical caballing an additional angle bracket is in the delivery.

Equipment features

- 19", 4HU
- holder
- for cable channel
- Covers for not used HU
- angle bracket for cable fastening

Module rack 19"
